

Oil Drum Crusher

Model D60

The D60

Dual purpose machine; ideal for crushing 55 gallon drums down to 4" in height as well as the compaction of waste inside the drum.

Waste products that are currently compacted into drums include paint booth air filters, shop rags, cartridge-style oil filters, low-level radioactive waste, laboratory garments, absorbent materials, metal and plastic containers, and glassware.

Dimensions

Height 117"
Width 42"
Depth 54"
Weight 2,300lbs (Shipping)

Specifications

Cycle Time 60 seconds
Cavity Size 30"w x 30"d x 48" tall
Motor- 10 hp, 3 phase, 208v-240v-480v
Crushing Force 60,000 lbs.

Options - Motor 1 hp, single phase, 208v-230v
50 Hz motor for international markets
Explosion-proofing (Class 1, Division 2)

Key Benefits

Quick change platen for easy conversion between drum crushing and in-drum compacting

Crushes drums up to 80 gallons in size.

Crushes drums down to 4" in height; significantly reduces storage space requirements and transport fees.

Features

Safe - meets all required safety standards.

Durable - heavy duty construction - all structural components are made of at least 3/8" steel

Automatic - push button control.
